

PARI(S) SANTÉ FEMMES

AGOF

Dear ENTOG Executive,

It is with great pleasure to invite you to one of the biggest scientific events the French Obstetrics and Gynaecology Society yearly presents, the 2022 Edition of Paris Santé Femme (PSF), held in Paris, between the 12 and 15 January 2022.

During 3 years of successful running of PSF, the event attracts annually more than 500-1000 participants. The 2022 conference will continue to provide the delegates (seniors as well as trainees) the technical hands-on sessions, lectures and showcase for scientific innovations, and unique networking opportunities. The official language of the conference and workshops held during PSF is French, however for the days of 14 and 15 January, with the help of our partners, PointGyn, we managed to introduce a couple of workshops and roundtables held in English, in order to enhance exchanges with European trainees. The workshops held in English focus on the following themes: hands-on obstetrical simulation, simulation in laparoscopy and hysteroscopy, Virtual Reality, and morphological ultrasound.

On behalf of the Executive Committee, we warmly welcome you to join us throughout the days of this conference and workshops and deliver a speech during this event for the fellow trainees. The participation at the conference is free of charge for the EC and for up to 30 European trainees, members of ENTOG (or who wish to participate through the ENTOG at PSF). Accommodation is assured with the help of our partner Pointgyn, rooms being available in the Villa M, the closest accommodation situated to the congress venue as well.

We would need the full list of participants before 27/12/2021. It is advisable that participants are able to provide proof that their supporting their national scientific OG societies as well.

We're looking forward to seeing you in Paris in 2022 for this new beginning and influential event.
